SUBWOOFERS
THE ULTIMATE IN BASS PERFORMANCE

PRECISION TUNED HIGH-IMPACT POWER

Engineered to enhance sound without overpowering it, we've built our subwoofers to deliver rock-solid low distortion bass that reaches down to the lowest frequencies, so they perfectly blend in with any main speaker. Whether you go for the astoundingly compact, yet sonically robust subs in the SuperCube Series, or opt for the winning combination of high output, extended and lightning-fast response in the ProSub Series, the result is always accurate, high-impact bass performance for superior home theater sound and life-like musical reproduction.

SUBWOOFERS

- SuperCube 8000**
