ADVANTAGES

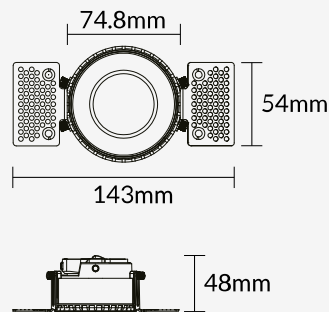

RAY Residence Tilt-able Flow housing with interchangeable housing, 30° Clicktilt technology & rotolock position fixing.

Part of our **Residence** range, the **Flow Plaster in Housing (Tilt)** is the perfect way to fit a recessed light fitting, before plastering is completed. The black '**wings**' can have their depth altered, so that you can choose how recessed you want the light to appear. The bezel on our Flow products provide a straight, cutting edge distribution of light, giving a '**modern**' feel to the space. All Residence products are interchangeable with rotolock position fixing. The added benefit of the Flow Tilt is 30° tilt technology, meaning that the beam of light can be angled to suit your space.

Cutout Ø78mm

Adjustable Angle 30°
